Professional Summary

Automation-first operator who joined Fastned UK at 15 people and built the processes, tools, and AI workflows from scratch that scaled operations to 50 people. Replaced fragmented manual workflows with scalable AI-integrated systems - from financial reporting platforms built with Claude to automated procurement workflows eliminating hours of manual overhead. Delivers £200,000 in procurement savings, eliminated supply chain delays from 50% to 0%, and manages financial operations for a multi-million-pound TfL Joint Venture. Thrives in startup environments where the operational infrastructure needs to be built rather than inherited.

Experience

Fastned UK Limited

2024 - Present

Senior Project Manager (Promoted 2026) | Project Manager (2024 – 2025)

- Built Pulse from zero using Cursor. Starting from an Excel MVP, iterating on user feedback, and delivering a platform now used by 20+ employees saving 160 hours per quarter in finance reporting.
- Applied commercial judgment to IDNO asset adoption and metering point decisions - choosing LV over substation metering to generate upwards of £1 million in additional asset value, reviewing repayment terms across the portfolio, and tracking grid connection OPEX to inform CAPEX budget modelling.
- Acted as connective layer across network development, location design, finance, business control, and project management teams. Analysing cross-functional data into board-ready governance outputs, coordinating with international teams weekly, and maintaining milestone tracking across 17+ concurrent projects as the operation scaled from 15 to 50 people.
- Designed the Fast Places Procurement Strategy as part of securing the multi-million-pound Fastned/TfL Joint Venture. A board-approved strategy that was subsequently adopted as the operational standard across Fastned's European network.
- Owned financial reporting and cashflow management for the multi-million-pound Fastned/TfL Joint Venture - producing structured quarterly variance models, cashflow projections, and board-ready financial reports, managing UK JV bank account liquidity, and coordinating quarterly cash calls to maintain operational continuity across the portfolio.
- Designed and built an AI-powered tender automation pipeline - replacing a manual comparison process across four contractors, nine pricing categories, and hundreds of line items on flagship projects including Hanger Lane - compressing the full cycle to 2 hours of human input.
- Achieved £200,000 in savings and eliminated supply chain delays from 50% to 0%, replacing single-source procurement with competitive multi-source tendering across a multi-million-pound UK construction pipeline.

Lungolingo Ltd (Seoul, South Korea)
Founder

2022 – 2024

- Founded and operated an international education recruitment consultancy.
- Secured two retained clients through direct business development, working with five schools and generating an average placement fee of £2,000.
- Managed the full recruitment lifecycle, sourcing and interviewing 23 candidates while balancing the requirements of both schools and educators to deliver successful placements.

2021 – 2023

Saint Paul American Scholar (Seoul, South Korea)

Lead Teacher (2022- 2023) | ESL Teacher (2021 – 2022)

- Led a tech stack refresh across the St Paul schooling network for 3 schools, 100 members of staff, and 500 students.
- Managed a team of 6 teachers, coordinating curriculum delivery across 3 departments, and contributed to board-level progress reporting across 4 affiliate schools.

2019 - 2021

Audit Partnership Limited

Contract compliance analyst

- Delivered financial compliance audits for major European retail clients including Leroy Merlin, identifying contract discrepancies and ensuring rigorous financial governance across cross-border commercial agreements.

Training & Education

Institute of Supply Chain Management
Level 6 Strategic Procurement Management

Present

HarvardX

2023

Certificate, CS50's Introduction to Computer Science

- CS50's Introduction to Computer Science - hands-on SQL, Python, and JavaScript.

University of Hull Business School

2017 - 2021

BSc Economics and Financial Management with Placement
